

Equity-Oriented Health Care Scale – Episodic (EOHCS – Episodic)^{1,2}

During this visit, did staff:	Yes (1)	No (0)
1. make you feel welcome?	<input type="radio"/>	<input type="radio"/>
2. try to make you as comfortable as possible?	<input type="radio"/>	<input type="radio"/>
3. treat you with courtesy and respect?	<input type="radio"/>	<input type="radio"/>
4. discriminate against you?	<input type="radio"/>	<input type="radio"/>
5. seem open to talking about what is important to you?	<input type="radio"/>	<input type="radio"/>
6. learn enough about you to give useful advice?	<input type="radio"/>	<input type="radio"/>
7. give you advice that is suitable for you?	<input type="radio"/>	<input type="radio"/>
8. learn about problems you might have getting services (e.g., costs, transportation, getting a referral, etc.)?	<input type="radio"/>	<input type="radio"/>
9. try to help you get services you need?	<input type="radio"/>	<input type="radio"/>

¹ The *EOHCS – Episodic* total score is a count of the number of items rated by patients as “yes” (1) for all items except “discriminated against you”. “Discriminated against you” is reverse scored, where yes (0) and no (1). Scores on the *EOHCS – Episodic* range from 0-9 and provide an index of the degree or level of equity-oriented health care (EOHC), with higher scores indicating patients experience care as more equity-oriented.
